

Mason Log Home Project at Dorothy Carnes Park East

Volunteers continue to work on the Mason Log Home project at Dorothy Carnes Park East. Blacksmith Jim Lemke recently finished the door and shutter hinges and thumb latch door handles. Volunteer Mike Engelhart has been working to install the shutters and doors this past weekend. The window sashes will be installed once all the exterior hardware is secure.

A big thanks to all the high quality volunteers who have been helping with the project since day one. We couldn't have done it without them.
